

Como vincular arquivo IFC no Revit

1 Abra o Revit

2 Clique em "novo" para abrir um novo arquivo

3 Selecione o tipo de modelo que você quer abrir

4 Clique em "OK"

5 Clique em "Inserir"

6 Clique em "vincular IFC"

7 Seleccione o arquivo IFC que você quer importar para o Revit

8 Clique em "Abrir"

9 Para visualizar melhor, clique em "vista 3D"

10 Para uma vista mais realista, clique em "Estilo visual: Linha oculta"

11 Selecione "sombreado"

12 E é isso...

Uma vez vinculado, você verá o modelo IFC no Revit, mas ele será estático e não editável.
